

# De-escalation for Mental Health Calls:

## A course for First-Responders & 911 Call-Takers

*"A compassionate approach for assessing, de-escalating, problem-solving and resolving mental health crisis situations."*

In the ever-changing roles of law enforcement, EMT's, Firefighters and 911 call-takers, it is more important than ever for all first-responders to learn the tools and techniques on how to successfully de-escalate people in crisis with non-violent tactics. This training will provide you with a comprehensive approach on how to compassionately use these strategies for a successful crisis intervention, especially those with mental illness and developmental disabilities.

Every first responder should take this course!

### This 8-hour training will include:

- Strategies on how to use verbal and non-verbal communication.
- Identifying positive alternative tools to use to prevent physical intervention.
- Learning how to overcome barriers to successful communication.
- The importance of using a team approach and defining roles.
- Common behaviors and actions of those with mental illness and effective tools to use.
- Discussion of real-life scenarios and problem-solving solutions.
- Mental health services available and the benefits of police follow up.
